Rafael Resendes since 2/1/2017

## Investment Strategy

The fund seeks to own companies it believes are undervalued and likely to create wealth for its shareholders by either: reinvesting profitability, returning capital back to shareholders, or restructuring unprofitable businesses. The fund relies on proprietary corporate performance and valuation research developed by Applied Finance over the past 25 years to identify undervalued, wealth creating stocks it believes offers attractive long-term total return potential. The fund sells holdings when such stocks, in the opinion of the fund, trade excessively above their intrinsic value, or have incurred changes to their operations or business environment that significantly change their wealth creation prospects.

**Information About Risk: Equity Securities Risk.** Since the Select Fund invests in equity securities, it is subject to the risk that stock prices will fall over short or extended periods of time. Historically, the equity markets have moved in cycles, and the value of the Select Fund's equity securities may fluctuate from day to day. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments. The prices of securities issued by such companies may suffer a decline in response. These factors contribute to price volatility, which is a principal risk of investing in the Select Fund. **Market Risk.** The value of securities in the Select Fund's portfolio will fluctuate and, as a result, the Select Fund's share price may decline suddenly or over a sustained period. The equity securities purchased by the Select Fund may involve large price swings and potential for loss. **Management Risk.** The strategies used by the Adviser may fail to produce the intended result. **Large Cap Risk.** Larger, more established companies may be unable to attain the high growth rates of successful, smaller companies during periods of economic expansion. **Risks of Investment Selection and Asset Allocation.** The Select Fund's investment success depends on the skill of the Adviser in evaluating, selecting and monitoring the portfolio assets. If the Adviser's conclusions about growth rates or securities values are incorrect, the Select Fund may not perform as anticipated.

The Morningstar information contained herein: (1) is proprietary to Morningstar (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. **The Morningstar Rating**<sup>SM</sup> for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. ©Morningstar **Rating** is for the AFVZX share class only; other classes may have different performance characteristics.

Key Definitions:

**Index - Morningstar Large-Mid Cap Value** - The index provides a comprehensive depiction of the performance and fundamental characteristics of the Large-Mid Cap Value segment of U.S. equity markets. TR indicates "Total Return". **Index - Russell 1000 Value** - Market-capitalization weighted index of those firms in the Russell 1000 with lower price-to-book ratios and lower forecasted growth values. TR indicates "Total Return". **Index - S&P 500** - A market capitalization-weighted index of 500 widely held stocks often used as a proxy for the stock market TR indicates "Total Return". **Active share.** The fraction of a fund's portfolio holdings that deviate from the benchmark index. The active share of a mutual fund ranges from zero (pure index fund) to 100% (no overlap with the benchmark). **Upside Capture Ratio** - measures a manager's performance in up markets relative to the market (benchmark) itself. It is calculated by taking the security's upside capture return and dividing it by the benchmark's upside capture return. **Downside Capture Ratio** - Downside Capture Ratio measures manager's performance in down markets. A down-market is defined as those periods (months or quarters) in which market return is less than 0. In essence, it tells you what percentage of the down-market was captured by the manager. For example, if the ratio is 110%, the ma
